

EVALUATOR RECOMMENDED: from isolated work-packages to functional and coherent clusters of attention

THEORETICAL

how is impact measured, where can we find impact, which datasets are important and how do we investigate them

LEGAL

A cross cutting theme in observatory/participatory space where they were bundled or reinforced by tools and methodologies for self-assessment or sets of building blocks for policy-making and decision-making

METHODOLOGICAL

tools and techniques should be a clear match to complement the more theoretical lines of approach

THEORETICAL

how is impact measured, where can we find impact, which datasets are important and how do we investigate them, what futures are we transitioning to?

POLICY GUIDANCE

IP/Policy recommendations and practice that apply across CHI sectors reinforced through research and observatory/ participatory space activities

DIGITAL PRAXIS

tools and techniques at the level of cultural heritage institutions and third party interest groups covering practices in digital practices from community creation to tools and practice

THEORETICAL

how is impact measured, where can we find impact, which datasets are important and how do we investigate them, what futures are we transitioning to?

POLICY GUIDANCE

IP/Policy recommendations and practice that apply across CHI sectors reinforced through research and observatory/ participatory space activities

DIGITAL PRAXIS

tools and techniques at the level of cultural heritage institutions and third party interest groups covering practices in digital practices from community creation to tools and practice

ENTREPRENEURSHIP

Focused on aspects that pertain to the digital single market.
